## 468 ARMED FORCES /5853/ PCS PANAVIA TORNADO IDS (Germany)

from **35,31 EUR**

Item no.: 374066  
shipping weight: 0.80 kg  
Manufacturer: COBI

### Product Description

You can build a German version of the Panavia Tornado IDS multi-role fighter from 493 high-quality COBI building blocks. The use of this type of fighter aircraft in the Luftwaffe began as early as 1979. 247 aircraft were delivered in total. Over the course of their many years of service, they have proven to be reliable and have become an integral part of German aviation history. In addition to standard service, they have also taken part in NATO operations. The active part of the Tornado fleet is being replaced by the American F-35 Lightning II. The set has been carefully designed in 1:48 scale and complements the very extensive collection of combat aircraft of the armed forces. The set contains high-quality prints. You will look in vain for stickers here! The bright colour and the Luftwaffe markings distinguish the German version of the aircraft from other versions available in the COBI range. Just like the original, the model has a mechanism that makes it possible to change the position of the wings (variable wing geometry). We also have a hinged cabin with space for two full-size figures, which are included in the set. The aircraft also has movable ailerons and a landing gear that can be easily removed at any time to present the aircraft even more beautifully on the brick stand included in the set. The nameplate is included in the scope of delivery. Thanks to the intuitive instructions, assembly is simple and poses no problems even for less advanced builders. The set will fulfil the expectations of aviation, military and block enthusiasts. The legend of the skies that Tornado undoubtedly is will look great in your army collection, no matter how old you are! Panavia Tornados are multi-role combat aircraft with variable wing geometry that have been used by the German Air Force since 1979. The Panavia Tornado is a twin-engine jet fighter aircraft developed by the Panavia Aircraft GmbH consortium, which included Germany, Italy and Great Britain. The Tornado IDS attack variant was put into service in Germany. Tornados were used as ground support aircraft, fighters and for attacks on air targets. They were capable of carrying a variety of weapons, including guided bombs and missiles. Tornado aircraft took part in various conflicts and operations, including Operation Allied Force over Kosovo.

Details- Scale: 1:48- Parts: 493- Age recommendation: from 8 years Technical data- Length: 36cm- Width: 28cm- Height: 13cm Contents- Components- Instructions Information- 493 high quality elements- Made in the EU by a company with over 35 years of tradition- Meets the safety standards for children's products- Fully compatible with other brands of clamp building blocks- Blocks with prints do not deform or fade during play or under the influence of temperature- Clear and intuitive instructions based on drawings and symbols- 100% prints, no stickers- block display stand- a sign with the name of the set- two pilot figures
