Product Description

Ugears is pleased to present the Indie Moto motorbike from the 2.5D ClassicVehicles collection- the first in the new series of 2.5D puzzles from Ugears! This cool wooden 2.5D motorbike picture model to build yourself has movable elements and its own frame. It can be hung on the wall or placed on a desk or shelf. Indie Moto depicts a cruiser in classic style. Various moving parts bring the picture model to life, including the handlebars, wheels, footrests and seat. The model is a great addition to the decoration of your home or office. The Indie Moto 2.5D jigsaw puzzle contains the true spirit of the road. This 2.5D puzzle is a fun DIY project, an attractive decoration for any room and ideal for anyone who wants to decorate their home with things they have created themselves. Unlike static framed pictures or assembled puzzles, this dynamic puzzle model of a vintage motorbike grabs the viewer's attention and invites them to move the handlebars, turn the wheels, fold down the footrests or adjust the seat. To assemble your 2.5D Indie Moto puzzle, simply press the laser-cut pieces out of the plywood panels and then put them together. You don't need any glue or special tools - everything you need for assembly is included in the box. The model kit comes with full-colour, easy-to-follow step-by-step instructions in 11 languages (Ukrainian, English, German, French, Polish, Spanish, Portuguese, Italian, Japanese, Chinese and Korean) to guide you through the assembly process. The motorbike indie moto comprises 42 parts and has an "Easy" difficulty level (estimated assembly time: 20-30 minutes), so that even newcomers to model making can assemble their DIY motorbike puzzle and proudly show it off. The 2.5D Indie Moto is made of high-quality plywood. You can leave your 2.5D picture puzzle of the motorbike in its attractive natural wood state or paint, varnish or stain it in the colours of your choice (colours not included). If a part breaks during assembly, no problem! As part of Ugears' dedicated customer service, we will supply you with replacement parts free of charge. Our new range of 2.5D puzzles has the distinctive aesthetic and cool design of Ugears, but unlike our 3D models, in this case we have made everything flat and put the model in a frame to make it an attractive decoration. If you want to store traditional puzzles after you've finished them, you have to glue them to a base and then buy a frame to hang them up. But your 2.5D Indie Moto puzzle comes already in its frame, with feet to stand it on and a picture hanger, so you can simply assemble your model and then hang or place it where you like it best! The 2.5D Indie Moto puzzle from Ugears with moving elements is a unique gift idea for friends or family who love motorbikes, ingenious mechanics, modelling, DIY projects or puzzles, or for anyone who appreciates a cool design. The Indie Moto is ideal for adults and children who are into "go, go, go!" and want to decorate their bedroom, living room, office or other rooms with their own DIY creations. Start your collection of Ugears 2.5D wooden picture puzzles today with the Indie Moto motorbike and then start exploring the wonderful world of Ugears 3D mechanical puzzles, with cars, trucks, ships, motorbikes, vending machines, robots, wooden puzzle boxes and STEM-Lab kits. Welcome to the wonderful world of mechanics and creativity! Welcome to the world of Ugears!
