Product Description

We are delighted to present a unique car model for fans of Harry Potter - the Flying Ford Anglia™, the car with a life of its own. The Flying Ford Anglia™ is equipped with a spring drive that transmits torque to the rear wheels and thus provides the driving force. Once wound up, the car can travel 3-4 metres using the mechanism under the chassis. The spring drum is safely stowed under the seats of the vehicle model and the real number plate at the rear serves as a start/stop button. It can also roll freely when idling. The front wheels can be swivelled 25 degrees in both directions, either using the steering wheel or directly by turning the wheels. This allows the car to drive either straight ahead or in circles (making the Anglia fly is up to you!). Thanks to its grippy rubber "tyres" on all four wheels, the car can drive on flat surfaces of all kinds, from carpets to slippery tiles. The side doors, boot and bonnet of the Flying Ford Anglia™ can be opened manually. When the bonnet is opened, the details of the engine can be seen and the boot offers enough space to store the model of Harry's trunk, on which the Hogwarts emblem is laser engraved. And this is where real magic comes into play: thanks to a special mechanism connected to the spring-loaded axle that runs through the vehicle interior, the Anglia has a secret "eject function". If you press the front number plate, the boot lid and side doors spring open and the folding front seats and a lever in the boot eject all passengers and luggage from the car in impressive style. Put Harry's suitcase in the boot and press the front number plate. The furious Anglia hurls everyone out mercilessly! Information- Item no.: 70173- Number of components: 246- Assembly time: 6 hours- Model size: 22.5 x 8.5 x 8.5 cm
