Product Description

The tracked off-road vehicle from Ugears is a stunning rock-hopping ride that stops the heart. Whatever your 4x4 off-road vehicle of choice, whether you use a UTV for hunting or getting around the farm, a sport ATV for thrilling trail adventures, a side-by-side for family trips in the country or a dune buggy to get to your favourite surf or truck for work and adventure, just one look at the tracks of this wooden Jeep model will trigger your "I do!" reflex. reflex. Our 1:24 scale ORV wooden model features a spring motor that allows it to travel more than three metres in "D" (drive) mode and more than four metres in "S" (sport) mode, an open cab, four-wheel drive, a bonnet that opens and rear safety bars, but the standout feature is the four track modules instead of wheels. Rubber track conversion systems such as Mattracks, Rubtrack and those of other manufacturers can be bolted to the rims of ORVs, tractors and rescue vehicles, allowing the vehicle to be used in any conditions and on any terrain. Never get stuck in mud or snow again - with tracks like these you can master everything without any problems. Information- Item no.: 70204- Number of components: 423- Assembly time: 8 hours- Model size: 24 x 12 x 13 cm
