70175 - Retro car -UGR-T

from **43,51 EUR**

Item no.: 392509
shipping weight: 1.00 kg
Manufacturer: UGEARS

Product Description

The UGR-T retro car is another elegant addition to the ever-growing Ugears collection of historic and modern cars, racing cars, motorbikes, trucks and other superb DIY vehicle models. To take you back in time, the Ugears design and engineering team has created a very special classic car model. Its outstanding features include a working folding roof with fabric overlay, front-opening lockable doors, a bonnet that can be opened on both sides to reveal a working four-cylinder engine with crankshaft, a pendulum that imitates the sound of the engine, front wheels that can be moved sideways with the steering wheel and a spare wheel mounted on the back of the car. To set the UGR-T retro car in motion, you must first set the start/stop button to "Stop" and wind up the spring-operated motor using the key located under the chassis. Then place the model on a flat surface, hold it firmly with one hand and press "Start". Now you can let go of the model and watch it drive away. The car has forward and reverse gears and neutral. The UGR-T retro car model will delight all fans of historic cars, fans of vehicle modelling and lovers of good 3D puzzles. This DIY car model makes a great gift - for holidays, birthdays or just because, an elegant decoration that will fit into any room, and it promises hours of fun as you assemble it and let your imagination run wild while playing. We hope you have a great time travelling back in time with the UGR-T retro car! Information- Item no.: 70175- Number of components: 337- Assembly time: 7 hours- Model size: 26.5 x 12.5 x 14.4 cm
