Product Description

Insert - For Roll for the Galaxy and Expansions: Ambition, Rivalry

The insert is compatible with Roll for the Galaxy and its expansions the Ambition and Rivalry.

The design provides both efficient storage and improved game play. The token trays can be utilised during the game and all trays greatly aid set-up and clear-away times. The rules and boards act as a lid on top of the trays.

With the top layer removed you can see underneath the remaining dice and token trays. At the top of the box are the trays for the vertical storage of the game tiles with separate spaces for the faction, home world, objectives and other tiles. In the middle are the dice and token trays. On either side of these are spaces for the game tiles and player dice cups.

There are four dice trays that come with the insert with slots for all the dice included in the original game and expansions. There are eight slots in total and the leader, entrepreneur, and pioneer dice are stored together in the largest slot.

The dice trays are made with a lip in the bottom left of each tray slot so that the dice never lie fully flat. This makes extracting the dice easy, no matter the number of each kind of dice in the tray.

The game tiles with separate spaces for the faction, home world, objectives and other tiles, are all stored vertically in purpose designed trays. These all have holes cut into the sides to make access easy during setup and game play. This is also where the original game phase strips and treasury limit strips are stored.

There are token trays, where one on the left stores the VP tokens, the large die faces and in one slot the dice tools, large black die and substitute counters. The other tray holds the large yellow dice, the talent counters and the player pieces.

Note that the six large white dice are stored inside the topmost cup, and that the extended phase strips & priority track are placed vertically between the game tiles and token trays.

All the trays can be removed from the box and used during setup and game play. This greatly speeds up the time needed to get the game to the table as well as clear away times. Once the insert is packed into the box you need to next place the cloth bag on top of the game tiles, folded into four and with the string end tucked down between the game tiles and large faction tiles tray. Next place the player mats at the top end. Then you can place the rule books and reference sheets, followed by the five Rivalry game screens. Lastly place on top the deal mat. This will fill the box to the top and the game can be stored vertically.

The design does not have space for the five game screens for the original game. These can either be stored separately or can be added on top of the other game components raising the lid by 2 mm.

Attention! Not suitable for children under 36 months.

Note: It is designed for games with external box dimensions of 29.7 x 29.7 x 7.3 cm.

This product consists of a flat-pack of 4x Evacore sheets. The trays require assembly, which is quick and fun, using ordinary PVA glue. Detailed instructions are included in the package.

Attention: The game must be purchased additionally. The content of the trays on the pictures is not included!

- Gross weight: 500 g
- Packaging dimensions: 25.5 x 35.5 x 2.2 cm
- Material: Evacore sheets
