Product Description

Insert - For Anachrony and Expansion: Exosuit Commander Pack

The insert is compatible with Anachrony and its expansion Exosuit Commander Pack.

The design provides both efficient storage and improved game play. Many of the trays can be utilised during the game and they greatly aid set-up and clear-away times.

The insert is designed to work together with the plastic tray that comes with the Exosuit Commander Pack and the insert trays go on top of this tray. This way the insert can be made with less material and hence at a more competitive price, and also you can store painted models safely.

There are trays for the player tokens, with each tray storing the banner, path and warp tiles, as well as the exosuit tiles. There is one additional tray for the Chronobot tokens and one for the collapsing capitals. The smaller trays are for the dice, the water, the paradox, and other tokens and stands.

There are card and building trays, where two trays are for storing the four building types, a tray for the superproject tiles and small cards to be stored vertically. There are three large card trays for the leader and player aid cards, the doomsday cards and the expansion cards. The last tray is for keeping the timeline tiles tidy. All cards can be sleeved.

There are trays for the resources, the workers, the breakthrough tiles and for the energy core and VP tokens. The tray for the anomaly and hex-unavailable tiles is also shown here.

As mentioned above, the trays can be used during the game to organise the components and make access by all players easy.

The boards and rules go on top of the trays acting as a lid, allowing the game to be stored vertically. This game has a lot of boards and larger tile components and it is important to stack them correctly to allow the box lid to close flush with the box base.

First goes the folded main board. This is followed by the folded doomsday and adventure boards, and to the left of these the exosuit upgrade and path boards are stacked, with the scoring pad on top of them. This raises the level to the same height as the next layer of trays, so that the player boards can be placed on top. Then go the guardian and evacuation action boards, followed finally by the rules.

Attention! Not suitable for children under 36 months.

Note: It is designed for games with external box dimensions of 27 x 22 x 10 cm and for the Exosuit Commander pack with the same 42.0 x 29.2 cm dimensions. Note that the insert does NOT work with the new smaller box Essential Edition, expansion pack, and Exosuit Miniature Set.

This product consists of a flat-pack of 6x Evacore sheets. The trays require assembly, which is quick and fun, using ordinary PVA glue. Detailed instructions are included in the package.

Attention: The game must be purchased additionally. The content of the trays on the pictures is not included!

- Gross weight: 700 g
- Packaging dimensions: 25.5 x 35.5 x 3.3 cm
- Material: Evacore sheets
