

Item no.: 365120

Insert: Rallyman: DIRT

from **20,25 EUR**

Item no.: 365120
shipping weight: 0.80 kg
Manufacturer: Folded Space

Product Description

This product is designed for a box size of 29.7 x 29.7 x 9.2 cm. Folded Space has also produced a similar Rallyman: GT insert FS-RMGT. Insert compatible with Rallyman: DIRT®, including the 110%®, Climb®, Co-Pilot Pack®, R4®, R5® and Rx® extensions. The design offers both efficient storage and improved gameplay. Many of the inserts can be used during play and they make it much easier to set up and put away. The rulebooks serve as lids on the inserts. The insert is arranged in up to three layers. This product also includes two cardboard boxes to store the hexagonal game board tiles separately. More on this below. The inserts offer space for all game components. The time card insert offers space for all cards that can be packed in sleeves. The two dashboard token inserts also have an extra slot at the end for additional damage tokens and the grey oxygen/cloud/climbing tokens. Each player gets their own tray for the tokens of their colour, including the three car miniatures. The two large card trays provide space for all the card sleeves and have large indentations on the sides to allow easy access to the cards. FS-RMDIRT includes two cardboard folding boxes to store all the card discs. These can be stored on your shelf next to the game and have a printed design that matches the game box. The two folding boxes are supplied flat-packed and need to be assembled. First open the box and fold back all the crease lines so that the box is square. Next you need to assemble the bottom parts of the box. Start with the long rectangular piece, followed by the side flaps, and finally tuck the piece in with a tab as shown. We recommend gluing the flaps together at the bottom of the box to improve strength as the card panels are heavy. Once the insert trays are packed into the box, you will need to place the bag of damage tokens on top of a deck of cards and place the six dashboards on top of the dashboard token trays as shown. Then simply place all the rulebooks on the insert (note that there is only room for one language version of the rulebooks). When the box is fully loaded, it is filled to the brim so that it can be stored vertically. FS-RMDIRT is an official game accessory. All trademarks and copyrights remain the property of their respective owners, who are in no way affiliated or associated with Folded Space EOOD. This product consists of a flat pack with 6 Evacore sheets and two card insert boxes. The trays and boxes must be assembled using normal PVA glue. Detailed instructions are included in the pack.
