Manufacturer: TAMIYA

Product Description

Item no.: 300058583 Designation: 1:10 RC Egress (2013) LWA 1989 The TAMIYA Egress 2013 is a modern version of the high-end racing buggy first introduced to the RC scene in 1989. It is based on the well-known Avante, but has been upgraded with special tuning parts. Numerous carbon and aluminium parts ensure an absolutely light and stable chassis that can easily keep up with modern competition buggies. New ball differentials and drivers distribute the engine power to the grippy studded tyres with even fewer losses. A central freewheel maintains steering capability when braking, as the front wheels can roll freely. The long wheelbase and large oil-pressure shock absorbers give the 4WD buggy directional stability and grip off-road, and the Egress 2013 can be tuned even further with optional tuning parts. Required accessories PS paint, batteries and charger, RC system with servo, motor and speed controller Contents 4WD kit model, vintage model, reissue, length: 430mm, polycarbonate body, Hi-Cap aluminium dampers, carbon chassis, instructions Warnings Before you start assembling, you should have read and understood all the instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit. Keep the kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. Caution! Not suitable for children under 14 years of age. Product details Technical details:- 2 mm carbon fibre double deck chassis- Central metal drive shaft- Aluminium motor mount- Central freewheel- Front/rear ball differential- Independent suspension with double wishbones- Adjustable toe and camber- Steel drive shaft driver- Aluminium oil pressure shock absorbers- High grip pin spike Tyres on lightweight rims- Longitudinally positioned drive battery- Aluminium steering knuckle- Stabiliser v/h- Completely mounted on ball bearings Technical data- Length 430 mm- Width 243 mm- Height 157 mm- Wheelbase 275 mm- Track width 200 mm- Ground clearance 40 mm- Wheel hub 12 mm- Tyre diameter 88 mm- Tyre width f/h 32/40 mm
