from **11,54 EUR**

Item no.: 388407  
shipping weight: 0.30 kg  
Manufacturer: Metermorphosen

### Product Description

From steam horse to ICE. THE RAILWAY CUSTOMS STICK The format of the metre sticks made of German hornbeam is made for railways! In four-colour print, the wooden railway folding rule shows 175 years of railway history: from the first journey from Nuremberg to Fürth to the latest ICE models. The bright colours of the trains and the loving design of the different types of locomotives and carriages on this collector's item depict the wide range of the railway world. The railway folding rule not only shows the trains in their full width, but also has another special feature: In addition to the millimetre scale, the railway folding rule has a reduction scale 1:87 = gauge size H0, which then shows 175 metres of the model scale over a length of 2 metres. This means that you can measure your railway models at home with the folding rule and get an exact idea of the scale of the real trains. The railway folding rule is a measuring instrument, toy, gift and collector's item all in one. Important information Caution! Not suitable for children under 36 months.
