Product Description

The Palatinate is special! Sometimes even "annerschd"!

That's why it doesn't deserve a conventional skat set, but one with heart and soul.

The Skat set consists of 32 playing cards. The special thing about it is that we have not used standard symbols such as hearts, spades, etc., but instead our game features the Palatinate in the form of the Dubbeglas, grapevine, stemmed glass or a wine bottle.

The game is the perfect addition to any game night or hike and should not be missing in any backpack!

Caution. Not suitable for children under 36 months.
