shipping weight: 0.30 kg
Manufacturer: TAMIYA

Product Description

Item no.: 300032589 Item no.: 1:48 Jagdpanzer Elefant The stand model is a replica of the heavy German tank destroyer known as the Elefant. The development of the full-size Elefant is an interesting case study in weapon development. The chassis was developed by Porsche in the design competition for the Tiger I. Although Porsche was confident enough of its success to complete 100 examples of the chassis before the end of the competition, the design was not selected. The "leftover" chassis was turned into the Elefant in 1942 - around 90 examples were built by May 1943. With armour plates up to 200 mm thick and a powerful 8.8 cm long-calibre gun, it was a formidable piece of weaponry and served German troops until the end of the Second World War. Kit model, scale 1:48, Vehicle, 1 figure, instructions, Decoration, length 172 mm. Attention! Not suitable for children under 14 years.
