COBI-2595 - 850 PCS HC WWII 2595 T-3476 mod 194142 2IN1T-3476 mod 194142 2 in 1 (PLSOV)

from **56,92 EUR**

Item no.: 394581
shipping weight: 0.60 kg
Manufacturer: COBI

Product Description

The T-34 tank, one of the most important tanks in history. It was developed by the Soviet Union in the interwar period and played a key role in the Second World War. COBI's model combines Soviet rawness with the architectural craftsmanship of designers. As a result, the machine is durable and perfectly reflects the dimensions and shapes of the historical prototype. In addition, the tank has a functioning chain traction. The turret and barrel are movable. Once you have removed the turret, you can take a look inside the vehicle. We can place a building block model of the engine under the service hatch. The model has permanent imprints imitating colour chips, equipment details and markings (Soviet and Polish to choose from). The T-34/76 tank, also known simply as the T-34, is one of the most important tanks in history and played a key role in the Second World War. In the 1930s, Soviet engineers began work on a new medium tank to replace the older T-26 and BT-7 models. In 1939, prototypes were created with the designations A-20 and A-32. The final model, the A-34, became the basis for mass production and was given the name T-34. T-34 prototypes underwent intensive testing and mass production began in Kharkov in 1940. The first models had a 76.2 mm L-11 cannon, which was quickly replaced by the more effective F-34 cannon. The T-34 was first deployed during the German invasion of the Soviet Union in June 1941. Despite initial logistical and training problems, the T-34 proved to be extremely effective on the battlefield. Its sloped armour, good mobility and powerful armament made it an opponent with which German tanks had serious problems. T-34 tanks also found a place in the 1st Warsaw Armoured Regiment, which was part of the 1st Tadeusz Kościuszko Infantry Division. T-34 tanks with a white eagle on the turret fought at Lenino or at the Warecko-Magnuszewski bridgehead, among others. 852 high-quality elements, Produced in the EU by a company with over 35 years of tradition, Meets safety standards for children's products, Fully compatible with other brands of clamp building blocks, Only permanent prints were used, no stickers. Clear and intuitive instructions based on drawings and symbols, 1 figure, Nameplate, Length: 22 cm / 8.66" Width: 10.5 cm / 4.13" Height: 9 cm / 3.54" Scale: 1:28 Number of parts: 852 Number of figures: 1 Age group: 10+ Detachable mini engine model, scale 1:28. Model dimensions (L x W x H): 260 mm (9 inches) x 110 mm (4.7 inches) x 90 mm (3.9 inches)
