## COBI-2592 - 1000 PCS HC WWII /2592/ PZKPFW IV AUSF.G

from **66,20 EUR**

Item no.: 390723  
shipping weight: 0.60 kg  
Manufacturer: COBI

### Product Description

The Panzerkampfwagen IV was one of the most important German tanks in the Second World War. The Panzer IV consists of 1,107 high-quality clamp building blocks and is designed on a scale of 1:28. The building blocks contain high-quality imprints that do not wear off during play. The colourful camouflage is characteristic of the final phase of the war. The model has an opening hatch in which an armoured figure can be placed. The turret can be rotated through 360 degrees and the gun barrel can be moved up/down. The turret and basket can be removed from the set and you can admire the interior of the vehicle. There is an engine to be built under the service hatch, which can also be displayed next to the model. The chain traction works when you move the tank by hand. The set includes a figure of a tank driver with cap and headphones as well as a sign with the name of the vehicle printed on it. Build a historic Panzer IV tank from the Second World War and discover amazing details!

The Panzer IV tank was developed by Krupp in the 1930s and entered service in 1939. Depending on the version, it weighed around 25 tonnes, had a 75 mm gun and was operated by a crew of five. It quickly became the backbone of the German armoured forces. Thanks to constant modifications and improvements, it was able to meet the challenges of the Allied tanks and anti-tank weapons. Its production totalled over 8,000 units, making it one of the most frequently produced German tanks during the war. The Panzer IV was used on all fronts of the war, from the invasion of Poland in 1939 to the French campaign, battles on the Eastern Front, and the campaigns in North Africa and on the Western Front. Its versatility and adaptability to different combat conditions made it one of the most valuable tanks in the Wehrmacht's armoury.

1.107 high-quality elements, manufactured in the EU by a company with over 35 years of tradition, fulfils the safety standards for children's products, fully compatible with clamp building blocks of other brands. Only permanent prints were used, no stickers. Clear and intuitive building instructions based on drawings and symbols, 1 figure nameplate, detachable mini engine model scale 1:28, model dimensions (length x width x height): 250 mm (10") x 135 mm (5.3") x 110 mm (4.3") length: 25 cm / 9.84" width: 11 cm / 4.33" height: 10 cm / 3.94" scale: 1:28 number of parts: 1107 number of figures: 1 age group: 10+
