

Item no.: 369298

RC Car, 1:10 RC TT-02R Chassis Kit

from **176,91 EUR**

Item no.: 369298
shipping weight: 2.00 kg
Manufacturer: TAMIYA

Product Description

The TT-02R is the tuning version of the popular TAMIYA TT-02 chassis. The R stands for the numerous included tuning parts: Ball bearings, alloy propshaft, engine mount, blue anodised parts, rear axle carrier with 3 degrees of toe-in for more stable handling. The suspension is equipped with CVA oil pressure shock absorbers fitted with black tuning springs. The kit is aimed at competition beginners and advanced drivers. Therefore the kit does not contain any electronics or bodywork.

Required accessories Remote control with receiver, steering servo, battery pack, battery charger, electronic speed controller, body.

ATTENTION! Before you start assembling, make sure you have read and understood all the instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Extra care should be taken to avoid injury. If any difficulties arise during assembly, ask an adult to supervise the work or a modeller with RC experience or a specialist dealer. Use tools only for their intended purpose. Incorrect use may result in injury. If you use paints and/or glues (not included in the kit), note and follow the instructions supplied with them. Keep kit away from small children. Prevent children from putting any components in their mouths or putting plastic bags over their heads.

Caution: Not suitable for children under 14 years of age.
