Product Description

The Alfa Romeo Giulia Quadrifoglio is a unique sports saloon that combines Italian style, advanced technology and impressive performance. This is a car for enthusiasts who appreciate not only speed and driving dynamics, but also the elegance and unique character of the vehicle. The Alfa Romeo made of bricks in the beautiful green colour is a perfect set for every car fan. Thanks to specially designed elements that faithfully reflect the shapes of the bodywork and durable prints, the vehicles created by COBI are excellent miniatures of classics! You can build the model from 90 high-quality elements. The car is perfect for display in an adult car fan's collection. Thanks to its solid construction and moving wheels on special rubber tyres, the model is also perfect as a toy. The Alfa Romeo Giulia Quadrifoglio debuted in 2015 as the top model in the Giulia series and was intended to compete with other premium sports saloons such as the BMW M3 and the Mercedes-AMG C63. The name "Quadrifoglio" (four-leaf clover) is a historical symbol of Alfa Romeo and has been used for the brand's sportiest models since the 1920s. The Giulia Quadrifoglio is powered by a 2.9-litre V6 engine with two turbochargers, which was developed in collaboration with Ferrari. This engine generates an impressive power output of 510 hp and a torque of 600 Nm. As a result, the car reaches 100 km/h in around 3.9 seconds and its top speed is around 307 km/h. These parameters place Giulia Quadrifoglio at the top of the sports saloons on the market. Giulia Quadrifoglio is characterised by its aggressive and elegant design. Characteristic features include powerful wheel arches, air intakes on the bonnet, large air intakes at the front and a striking three-dimensional radiator grille. Aerodynamic details such as the active front splitter help to improve traction and stability at high speeds. - 90 high-quality elements, - Produced in the EU by a company with over 35 years of tradition, - Complies with safety standards for children's products, - Fully compatible with clamp building blocks from other brands, - Only permanent prints used, no stickers - Clear and intuitive instructions based on drawings and symbols, - Scale 1:35 - Model dimensions (length x width x height): 13 cm x 6.5 cm x 4 cm - Number of parts: 90 - Age group: 6+
