from **28,07 EUR**

Item no.: 384004
shipping weight: 0.50 kg
Manufacturer: COBI

Product Description

Lockheed® P-38 LIGHTNING® is a fast and heavily armed American long-range fighter aircraft from the Second World War. This unusual twin-engine aircraft had a "gondola" with a pilot's cabin between two fuselages. The so-called "flying frame" performed very well, which led to a long production period from 1941 to 1945 and an outstanding number of launches by American pilots. The aircraft was only decommissioned in 1965. P-38 LIGHTNING was released under the original licence of the American armaments company Lockheed Martin. The 1:48 scale model of the aircraft consists of 332 COBI building blocks. The model is covered with high-quality prints that do not wear off even with intensive use. The aeroplane has rotating propellers. This famous aeroplane is a perfect gift idea for fans of aviation, history and technology. It is sure to satisfy even the most discerning collectors and young people who are enthusiastic about miniature aeroplanes. Build history, brick by brick, with COBI! - 332 high-quality elements - manufactured in the EU by a company with over 20 years of tradition - meets the safety standards for children's products - fully compatible with clamp building blocks from other brands - building blocks with imprints do not deform or fade during play or under the influence of temperature - clear and intuitive building instructions based on drawings and symbols - 100% prints, no stickers - Lockheed Martin licence - model dimensions (L x W x H): 24.5 cm (9.65 in.) x 32 (12.99 in.) x 8 cm (3.15 in.) - Age range: 7+
