## 37080002 - RC 8.4V 500mA CHARGER

from 12,47 EUR

Item no.: 363999  
shipping weight: 0.10 kg  
Manufacturer: Carrera

### Product Description

- Power supply for your RC model- Charger 8.4 V 500 mA- Package contents: 1 pieceReplacement charging cable for RC models with 8.4 voltsYou can use this charger to recharge your remote-controlled car or drone. It is important that you pay attention to the correct voltage (V). This power supply has 8.4 V. The unit milliampere hours (mAH) represents the amount of charge that can flow through the device and the conductor in one hour. With this mains plug, this is 500 mA. Safety is also taken care of with this device. It has the CE mark, the GS mark, is certified by TÜV Rheinland and has protective insulation. According to electronic waste regulations, a disused plug-in power supply unit should not be disposed of with residual waste. In addition, the device should only be used indoors. The protection class is specified with the code IP40. This means that the charger is protected against solid foreign bodies with a diameter of 1.0 mm or more (4), but has no special protection against water (0).- Age recommendation: 14 years and older
