## 300047500 - 1:10 RC Toyo. Celica GT-Four TT-02 paint finish.

## from 134,90 EUR

Item no.: 390537 shipping weight: 1.50 kg Manufacturer: TAMIYA

## Product Description

The Toyota Celica GT-Four RC was developed as a homologation car for participation in global rally races and 5,000 units were sold worldwide in 1992. This car, with its curved, powerful body, had a 2-litre turbocharged engine with metal turbines and a water-based intercooler system that produced 235 hp. The 4WD system utilised a centre viscous coupling and a Torsen rear differential for excellent controllability and traction. In global rally races in 1993, the Celica GT-Four won both the manufacturers' and drivers' championships for Toyota (ST185) for the first time. The proven TT-02 chassis serves as the basis for the TAMIYA 1:10 scale model. The wheelbase, ground clearance, track and gear ratio can be adjusted in many ways and the chassis can be quickly tuned into a racer with the countless optional tuning parts. The 4WD drive with central shaft, double wishbones and suspension struts on all four wheels ensure a true-to-life driving experience and optimum traction. The underside of the chassis has an extra smooth design and the battery compartment accommodates all standard battery types. A visual highlight are the wheel drivers, which have attached dummy brake discs. Required accessories: Remote control with receiver, steering servo, 7.2V NiMH battery pack, charger- 4WD kit model, TT-02 chassis, - Elect. Speed controller, 540 Torque-- Tuned motor, pre-painted polycarbonate- Body with add-on parts, cardan drive, - Suspension struts, independent suspension, - Tread tyres, tub frame chassis, - InstructionsATTENTIONIBefore you start assembling the model, you should have read and understood all instructions. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury
