## 300058489 - 1:10 RC Avante 2011

from **470,89 EUR**

Item no.: 390614  
shipping weight: 1.50 kg  
Manufacturer: TAMIYA

### Product Description

When the TAMIYA Avante was first delivered in 1988, it took the RC world and thousands of fans by storm. Almost a quarter of a century later there is another Avante, the Avante 2011 on a modernised chassis. The 2011 version is limited to 333 units in Germany. The original fibreglass decks have been replaced by 2 mm thick carbon fibre decks, which increases stability. The chassis has been optimised for the installation of modern RC components. The rear shock tower is stronger and now also reinforced with carbon fibre. A cross connection between the right and left arm increases stability. The original steering knuckles have been replaced by strong and lightweight aluminium parts for improved performance. The polycarbonate bodywork, rear wing and side panelling are designed for tough off-road use. The packaging of the 2011 model has the same design as the original version. The "Avante" logo and the rear wing decals are unchanged. The other elements of the decal sheet have the modern Tamiya design. Kit with detailed assembly instructions. You should read and understand all instructions before starting assembly. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit. Keep the kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. Caution! Not suitable for children under 14 years. Product details Technical details- central drive shaft- 25T electric motor type 540- planetary gearbox front/rear- reinforced wishbones- adjustable toe and camber- steel drive shaft driver- 2 mm carbon fibre double deck chassis- oil pressure shock absorbers with gold-coloured shock absorber caps- high grip pin spike tyres - high grip pin spike tyres High Grip Pin Spike tyres with inserts and Cam-Lock central lock- Longitudinally positioned drive battery- Aluminium steering knuckle- Rear shock absorber bridge reinforced with carbon fibre- Stabiliser v/h- Splash guard to protect the electrical components- Complete ball bearings- Incl. electronic speed controller Technical data- length 420 mm- width 240 mm- height 140 mm- wheelbase 260 mm- track width 200 mm- ground clearance 40 mm- wheel hub 12 mm- tyre diameter 88 mm- tyre width 38 mm
