Product Description

HMS Beagle model kit in 1:96 scale Discover the fascinating model kit of the HMS Beagle, a legendary British research ship. This 1:96 scale kit is a detailed replica of the historic ship known for its pioneering expeditions, including the famous voyage with Charles Darwin. With a parts count of 178 pieces, this model kit offers a challenging yet rewarding experience for advanced modellers (level 4). The dimensions of the model are impressive: a length of 385 mm, a width of 100 mm and a height of 298 mm make for an imposing presence. Recommended for modellers aged 12 and over, this set combines historical education with the fun of detailed modelling. Included:- Textured hull with gun ports- Detailed deck with hatches- Bow section with decorative elements- Detailed masts and yards- Additional information material on the history of HMS Beagle Ideal for advanced modellers (level 4), this set requires experience in gluing and painting. It is perfect for those who want to develop their modelling skills while holding a piece of history in their hands. Special features:- Authentic replica of a historic research vessel- High level of detail for a realistic modelling experience- Historical information material for educational purposes Background information: HMS Beagle is best known for her role in scientific history. She made a significant contribution to the development of the natural sciences, particularly through the expedition with Charles Darwin that led to his theory of evolution. This model kit not only offers a captivating building experience, but also insights into an important chapter of 19th century scientific history.- Width: 10 cm- Length: 38.5 cm- Height: 29.8 cm- Recommended age: 13- Scale: 1:96- Individual parts: 178
