Product Description

1:16 RC Brit. Centurion Mk.III Full-Opt. Item no.: 300056045 Item code: 1:16 RC Brit. Centurion Mk.III Full-Opt. The Centurion is a heavy British tank from the 2nd World War which was developed as a defence against the German tanks in 1942. The Mk.III was the most powerful version and was equipped with an L/66.7 20lb gun. It was further developed during the Korean War in 1950 and was an extremely robust and powerful weapon system. Between 1948 and 1956, 2800 units were produced. After the Korean War, the Mk.III was used in many countries such as India, Israel and Egypt. The model has been faithfully reproduced and features numerous details such as surface textures and weld seams. A 4-channel remote control is required for operation, which can be used to control forward/reverse, track rotation, turret movements, cannon control, etc. The DMD unit provides the true-to-original engine sound as well as machine gun and cannon sounds. Just like the original, the model movements are linked to the firing of the cannon (recoil). An LED simulates the muzzle flash. Required accessories: Remote control with receiver, 7.2V NiMH battery pack (no LiPo!), colour Tank kit with multifunctional unit DMD T-11C (for sound and light effects), instructions, 2x 380traction motors, Horstmann suspension, aluminium hull, metal wheel suspension, wheels with rubber tyres, single-link track, loudspeaker, 2 servos TSU-03. WARNING: Read and understand all instructions before starting assembly. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit. Keep the kit away from small children. Prevent children from putting any parts in their mouths or pulling plastic bags over their heads. Product details- 1/16 scale armoured model, kit- Length: 603mm, width: 214mm, height: 187mm- Faithful reproduction of the Centurion with its distinctive shape. Detailed finish with welded seams and surfaces.- Can be controlled via a 4-channel remote control: forwards/backwards, turns etc., cannon can be moved, turret can be rotated. Cannon can be moved, turret rotation and realistic recoil function with simulated firing. Characteristic engine sound, machine gun and cannon sound via the DMD multi-function unit.- Includes 2x 380 motors for the drive, 1x 130 motor for the turret control, 2x TSU-03 servos for the cannon control- Cannon barrel made of aluminium, suspension arms and drive wheels made of cast metal- Realistic track movement using a Horstmann suspension. Track is supplied pre-assembled.- Battery cover is fixed with magnet for easy access- Compatible with the TAMIYA No.53477 Battle System
