300056376 - 1:14 RC Scania 8x44 Gun Met. Paint

from **849,82 EUR**

Item no.: 397320
 shipping weight: 2.00 kg
 Manufacturer: TAMIYA

Product Description

The Scania 770S 8x4/4 is a real workhorse! It is the heavy-duty version of the Scania 770S - the top model from Scania. Tamiya has recreated one of the most beautiful and powerful heavy-duty tractor units in 1:14 scale. The S series from Scania includes a V8 turbo engine with 770 hp. The 8x4/4 means that the original is driven on 4 wheels and the two front axles are steered. Exactly these functions are also reproduced in the Tamiya model: The model is driven via the two rear axles and with a 3-speed manual gearbox. The two front axles are controlled via a steering servo and, as in the original, have different steering angles. The second axle can be lifted. The wheels can be raised (lift) or lowered using a mechanical lever on the top of the chassis. The highlight is the faithfully reproduced heavy-duty tower behind the cab. The pressure vessels are located in this heavy-duty tower for a realistic appearance. The body parts are already pre-painted in TS-38 Gun-Metal. Accessories required: 6-channel remote control (recommended Carson Reflex Wheel Stick), 1x steering servo, 1x switching servo, rechargeable battery, charger, batteries for transmitter Scania 770S 8x4/4 model kit, heavy-duty turret, ABS plastic cab with aero package, pre-painted in gun-metal aluminium ladder frame, 2 steering axles, 2nd steering axle manually liftable, 2 driven rear axles, 3-speed manual gearbox, chromed rims, wide rims with wide tyres at the front, instructions, 540 electric motor ATTENTION! You should read and understand all instructions before starting assembly. If a child is assembling the model, a supervising adult should also have read the assembly instructions. Tools including knives are used when assembling the kit. Special care should be taken to avoid injury. If difficulties arise during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer. Only use tools for their intended purpose. There is a risk of injury if used incorrectly. If you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit. Keep the kit away from small children. Prevent children from putting any components in their mouths or pulling plastic bags over their heads. Caution! Not suitable for children under 14 years of age. Product details: - RC model, 1/14 scale kit - Length: 610mm, width: 196mm, height: 320mm - SCANIA S770 the TOP model from the S series - incl. driver figure - Cab with high roof, aero package and stylish roof light bar (LEDs can be retrofitted, optionally available) - Mini radiator grille light bar (LEDs can be retrofitted, optionally available) - Pre-painted body parts in TS-38 Gun-Metal - Side panelling marker lights (LEDs can be retrofitted, optionally available) - Wide tyres with wide rims (chrome) on both front axles - 2nd steering axle can be lifted manually - Faithful reproduction of the original fittings (mirrors, aerials, heavy-duty tower, compressed air tanks, fuel tanks, exhaust system, warning beams and lights) - True-to-original interior with dashboard and seats - True-to-original axle suspension on leaf springs with friction dampers leaf springs and friction dampers - Aluminium ladder frame with plastic frame connectors - 4-axle tractor unit with 3-speed gearbox - 2 driven axles - Incl. 540 TR tuned motor - Matching LEDs (3mm white) for lamp bracket - Top: 1x 317175097 (2); 3x 307175099 (1) - Bottom: 2x 317175097 (2)
