Product Description

Immerse yourself in the fascinating world of military modelling with our modern Leopard 2 A6 model kit. This exquisitely designed kit brings the impressive Leopard 2 A6, one of the best main battle tanks in the world, to your home in perfect miniature form. The 1:35 scale kit includes finely detailed surface textures that authentically replicate the original tank. The rotating turret gives your model a dynamic touch and allows you to recreate different positions. The model represents both the German Bundeswehr version and the Dutch Army version of the Leopard 2 A6, with every detail meticulously captured. Scope of delivery: - High-quality plastic model kit in 1:35 scale (not assembled). - Illustrated, multilingual assembly instructions for easy assembly. - Decals for a realistic and detailed look of the model. Our Modern Leopard 2 A6 model kit is suitable for both beginners and experienced modellers. This impressive model can be used in a variety of ways, whether as an exhibition piece, for exciting play scenarios or as a valuable collector's item. What makes this kit particularly special are its highly detailed parts, which ensure a realistic design of the Leopard 2 A6. The ability to choose between the German and Dutch versions offers unique flexibility. In addition, this kit is characterised by innovative building techniques that facilitate assembly and guarantee a first-class result. Background information: The Leopard 2 A6 is a symbol of military strength and precision. It is still one of the best main battle tanks in the world and is used by both the German and Dutch armies. This model building project allows you to experience the history and technology of this impressive tank up close and recreate it in your own home. Immerse yourself in the world of military history and modelling with our modern Leopard 2 A6 model kit! Caution: Not suitable for children under 12 years of age.
