TR15512 - Educational puzzle "Map of Germany" 44 pieces

from **5,40 EUR**

Item no.: 398194
shipping weight: 0.10 kg
Manufacturer: Trefl

Product Description

The educational puzzle map of Germany is the best way to show your child how beautiful our country is. First put the individual federal states together to form the shape of Germany, then you can put together the puzzle frame, which consists of the neighbouring countries as well as the Baltic and North Seas. This game helps the youngest children to memorise the administrative structure of the country - and also to learn which countries are our neighbours. In addition, the colourful illustrations show, for example, where the nutcracker was invented, what a traditional Bavarian costume looks like or which animals can be found in the German forests. Check how much you already know about Germany! Puzzle and learning fun in one. Put the puzzle together and learn about the federal states and traditions. For children aged 4 and over. Item number: TR15512EAN: 5900511155129 Caution! Not suitable for children under 3 years. Contains small parts that can be swallowed - choking hazard!
