23811 - RC Quadrocopter Navigator NXT

from **244,03 EUR**

Item no.: 398478
shipping weight: 1.00 kg
Manufacturer: Revell

Product Description

With the high-quality GHz Navigator NXT quadcopter, hobby pilots and photo artists have completely new possibilities for perfect aerial shots and enjoy easy flying with lots of technical highlights: the perfect image and video quality of the 2.7K camera is supported by a 2-axis brushless gimbal, which ensures absolutely smooth image recordings without blurring. And the motors of the Navigator NXT are also brushless, so that precise flight manoeuvres are executed perfectly and without delay. Thanks to its powerful LiPo battery, the quadcopter has a flight time of 25-30 minutes. A second battery supplied doubles the flying fun to around one hour - just right to be prepared for anything on the go. The Navigator NXT quadcopter and accessories are supplied with a Revell Control soft cell box, which guarantees uncomplicated, safe transport of the equipment. The model is perfected by features such as follow-me, orbital flight function, flight by waypoints and much more. Scope of delivery: 1x model 1 x GHz remote control 2 x LiPo battery 1 x USB charger 1 x spare rotor set 1 x Softcell box 1 x instruction manual Discover the Navigator NXT on our themed website at: <https://navigator.revell.de/Download> App iOS: Download Android: Download Age recommendation 14
