Product Description

Starfinder - Alien Archive 2, hardcover (DE), 160 pages

Space is full of strange races and creatures, not all of which are nice and friendly! This volume contains a plethora of new creatures for the Starfinder RPG. Laser-spewing tashtaris, space amoebas devouring spaceships, dust mantas and undead bone soldiers are a few examples of what awaits you in this monster guide! No matter where adventurers travel in the galaxy, challenges will await them. Some of the presented new races are also suitable for player characters. Let the players not only fight alien beings, but let them play these aliens!

In this volume you will find the following:

- Over 100 bizarre life forms, some familiar, others new, including the voracious Akatas, the silicone-based Quorlus, radioactive Pluprex demons and vermin living in space.
- Over a dozen races suitable for player characters, including Awakened bears and intelligent snail creatures.
- New alien technology that can give your character an advantage, be it armor, weapons, magical items or spells.
- New rules for magical shapeshifting, templates for environments and how you can quickly adapt creatures to other worlds.
- and of course much, much more!

Warning !Not suitable for children under 36 months.
