Product Description

DSA Remastered - The seven magical goblets (DE), 68 pages

Siebenstreich "was called the great magic sword in ancient times in Aventuria. Only the strongest of all the great heroes of the Landes were able to lead it. Later it was melted down and seven magical goblets were formed from it, which are kept in various secret places in Aventuria. If you combine them, "Siebenstreich", the dangerous weapon, is created again. The dark forces know this and are doing everything in their power to take control of the seven goblets. When they have already abducted six of them to the temple city of H'rabaal, things get tricky. The goblets have to be regained.

But Jan Rasmussen, Kim Shayenne and their friends alone cannot recover the heavily guarded treasure. They need comrades-in-arms to be able to withstand demons, bloodthirsty Marus, five-headed hydrons and other monsters. Who is participating?
