### Product Description

DSA Remastered - Havena Stadtbox: Kaiser-Retro-Edition, paperback (DE), 240 pages

Let yourself be carried away to the city at the mouth of the Great River, the city of seafarers and land travelers, poor and rich, strays and adventurers, magicians, consecrated people and priests. HAVENA - a legend awaits you!

The proven team of authors of the Black Eye has presented an extensive collection of material with this useful addition: On 64 pages you can find out everything about history, the present, politics, trade, residents, craft guilds, but also vampires, black magicians and the legendary Necker, those sea people who have long since ceased to attract attention in the everyday hustle and bustle of this city.

Over 250 houses, around 150 people and almost 30 different organizations are sometimes detailed here, partly touched on in key words, and a six-page table screen informs on the one hand about encounters of all kinds in the streets and buildings of the city, on the other hand about the usual prices in this city for a wide variety of everyday goods. In addition, around 20 new weapons are presented, complete with all the necessary values.

A four-color, washable, large-format city map serves players and game masters as an orientation aid, while a double-colored (A1) single-color map is invaluable for the game master as a guide Provides service.

In addition, the most important buildings in the city are reproduced in great detail on floor plans. And for dice lovers, three ten-sided dice have been added this time.

By the way:

This is just the beginning of this city description; Thanks to the new structure of the city guide, HAVENA can be expanded practically without limits.

A must for all role-players - indispensable for all black-eye players

Attention! Not suitable for children under 3 years!

One of the three necessary sets of rules. The other sets of rules are required!
