Product Description

DSA - Armory of the Steaming Jungle (DE), 32 pages

On the misty ridges of the rain mountains, on the pearly white beaches of the forest islands and in the impenetrable rainforest in between have existed for millennia the tribal cultures of the forest people and utulus and watch over the dangerous mysteries of the steaming jungle.

The craftsmanship of the inhabitants of the rainforests of the deep south is not infrequently ridiculed by other cultures. There is hardly a class of people who know how to use what nature has to offer in the best possible way. Who else besides the tribes of the rain mountains knows twins made of elastic lianas? Effective diving spears and harpoons are used on the rivers and coasts of southern Aventuria. The warriors of many a tribe are feared for their skills with the blowpipe, with which they can drive poisonous arrows into the flesh of their enemies. But even a Mediterranean explorer is well advised not to set off into the ruthless primeval forests of the south without the right equipment - a reliable machete and an explorer's whip are definitely indispensable! The armory of the steaming jungle contains an almost inexhaustible fund of various objects to defy the dangers of the rainforests. And of course there is also a variety of tools that the resourceful inhabitants of the jungle manufacture from rather unusual materials.

As if that weren't enough, this volume also offers background information on equipment made from the shimmering blue epharite, a metallic material that makes the Alchemists of the South have been puzzling more and more in the recent past. Finally, there is also a detailed treatise on the complex customs of barter, which determines the mercantile relationships of the jungle tribes with one another, but often also with outsiders.

This volume supplements the regional game aid Die Dampfende Jungle with extensive and generally applicable rules for the special objects of the region. Knowledge of the rules and the Aventurian Almanac is required.

Warning! Not suitable for children under 36 months.

The set of rules and the Aventurian Almanac are required!
