from **19,36 EUR**

Item no.: 338727  
shipping weight: 0.10 kg  
Manufacturer: Ulisses Spiele

### Product Description

DSA - Atmospheric Sounds, 2-part album (DE)

Classic places of the wilderness, the cultivated land and the localities of Aventuria are toured within the framework of this two-part concept album, without being caught up in the action distracting at the gaming table. Instead of music, the atmospheric sounds provide background noise for the relevant regions, such as the whispering of the ice desert, the rustling of forest leaves and the tangle of jungle, as well as exciting weather phenomena such as the roar of wind and splashing rain that characterize the game. CD 2 also offers a range of inhabited places and sounds of social gatherings, from campfire evenings to library whispers to the clink of steel swords.

Warning! Not suitable for children under 36 months.

< p>The set of rules is required!
