Product Description

The Black Eye - LARP Magic and Prayer Book, hardcover (DE), 200 pages

How do typical DSA magic work in live role-playing games? And what about the liturgies of the twelve gods? As a supplement to the set of rules for LARP-Cons in the world of The Dark Eye, this book provides a comprehensive list of sayings and miracles for magicians as well as other spellcasters and devotees. It also summarizes all talents, potions, herbs and poisons. The book is kept completely as an in-game book, so it does not contain any photos and the typesetting and layout were chosen in such a way that the inside also appears one hundred percent "ambient". A LARP magician or a LARP devotee can take this book with him at every con and use it as a reference work at any time. Read from the front it is the Codex Cantiones, read from the back the Liber Liturgium.

Warning! Not suitable for children under 3 years!
