Product Description

DSA Spheres Sound - The River Lands (DE), Audio CD

The gentle and fertile floodplains of the Great River and the jealously guarded mountain ranges of the dwarfs together form the River Lands, a refuge the tradition, in which comfort, law and order are upheld.

This audio CD was designed by Ralf Kurtziefer and his creative team under the Orkpack label to provide musical accompaniment to the many facets of the riverside. Explore a region where pious love for order and anger-pleasing efficiency go hand in hand. Experience the densely populated hustle and bustle and the self-confidence of the mighty northern brands just as closely as the high value of community and cosiness in Kosch. But also an auditory glimpse into the mountain kingdoms of the dwarves and into the mysterious legacies of wars long past will of course not be neglected!

All of the pieces were specially designed for play in the river lands. But they are also suitable as background music for other stories or simply as an entertaining musical enjoyment. Warning! Not suitable for children under 36 months.
