shipping weight: 0.40 kg
Manufacturer: Ulisses Spiele

Product Description

DSA - hit zone set (DE), 10 hit zone cubes + rules

The hit zone set contains ten different hit zone cubes with individual limb symbols. Each cube has different distributions for the templates presented in the Aventurian Compendium. Regardless of whether you are dealing with a human-sized opponent, a hideous ogre or a stinking Tatzelwurm: The set always includes a matching hit zone cube.

In addition to the dice, the set also includes a game aid, which summarizes focus rules from the Aventurian Compendium and the Aventurian Armory on the subject of hit zones, and on the other hand introduces two new focus rules.

These rules go into more detail on the injury within a certain zone and thus bring more depth into the game. In this way you can determine more precisely which area of the arm was hit and what effects a wound on the wrist or upper arm, for example, has. The set is supplemented by a collection of special skills and advantages and disadvantages.

Warning! Not suitable for children under 36 months.

The Rules are required! As well as Aventurian Compendium.
