📄 Product Description

Dungeons & amp; Dragons: Class Marker Set - Warlocks

This D&D class token set allows you to quickly and easily manage your character's status effects. If your character is frightened, paralyzed, or passed out, your companions can tell at a glance that you need help. Since all of our full-color markers are made of durable acrylic, you can write on them with additional information and wipe them with a damp cloth at any time. You can keep track of all regularly changing values, such as your character's hit points and resources, in one place with the help of the combat overview, without any unsightly eraser marks on your character sheet. The marker set is presented in a metal box suitable for your class, with a field for the name of your character.

Warning! Not suitable for children under 36 months.
