Product Description

The Black Cat: Dog Days - Fasar Adventure Anthology (EN Edition)

The days in Fasar are hot and sometimes unbearable without cooling shade. True dog days!

Through the northern city a meowing sounds from the crypt. An eternal one, those mystical cat mummies who rule over the cats' territories, has risen from her cold grave and is searching for her lost memories.

Elsewhere, The End of Puppies looms, a series of abductions of the weakest among the Awakened strikes fear into everyone's hearts. Cats and dogs blame each other and the conflict escalates. To keep the peace, the culprit must be caught!

Outcasts, renegades! The Gulsach traitors are dogs who have lost their honour. Tavon was chased away in disgrace. Now contact with his mother has been severed. Surely he may not have got her into trouble again, or even something worse? Will he end up as a bone for Gulsach or can brave heroes still save him from this gruesome fate?

These three adventures are suitable for players who do not shy away from the tough terrain of Fasar. A fragile peace reigns in the dominion of Malik Ameer and it is up to the heroes to maintain it.
