Product Description

The Black Cat: Flute Play - Havena Adventure Anthology (EN Edition)

How much you loved listening to your mother's stories when you were a kitten. They promised a world of wonder where good always triumphs. This anthology deals with some of the legends of the Awakened of Havena made flesh. Whether "good" prevails here too lies in the paws of brave heroes. Flute notes echo through the depths of Havena's sewers, attracting rats in droves. The Deepflings of the Darkguard clan are desperate as they must beat back wave after wave. Some whisper the name of the culprit behind held paws: the Rat King!

Not much is known about the Wanderer, the nebulous ancestor, but The Wandering Hat is a story retold by generation after generation of awakened ones. It promises the fulfilment of the most ardent wishes. But be careful what you wish for, for your wish may come true. Moonbells! Moonbells, everywhere! While the have-nots can finally pay their debts, the rich cats howl indignantly and have to watch the value of their hoarded treasures plummet. But where do these immeasurable riches come from from one night to the next? The words "Mantemante Timpete" echo in the thick fog, and a terror rises from the black mirror. These three adventures are suitable for players who are enthusiastic about myths and legends. And who knows, maybe they will end up becoming legends themselves.

- Type: Adventure volume
- Language: German
- Number of pages: 48
