Product Description

This expansion introduces two new houses, the Ixians and Tleilaxu, to the Dune board game.

Tleilaxu: The fanatical, xenophobic Tleilaxu, led by a small council of Tleilaxu masters, were tolerated for their useful gifts in genetic engineering. Even though others underestimated and detested them, they hoped to one day rule them all.

Ixians: The cyborg Prince Rhombur of House Vernius leads the Ixians, masters of production and technologies that only they know how to use. Both Ixians and Tleilaxu are a vital part of CHOAM and the Empire. The royal family of Ix was one of the richest families in the Empire. Due to the successful invasion of Tleilaxu and the Emperor's Sardaukar, and then, after many years, the liberation of Ix by Ixian and Atreides forces, the Ixians and Tleilaxu became arch enemies.

This expansion also introduces new game rules to gain advantages over your rivals.
