Product Description

This essential expansion for the world's greatest role-playing game (goblins eat babies! Just so there's no confusion!) contains a truckload of great new stuff: New spells, monsters, everything to do with the gruesome Kuthobold, equipment and much more. You'll also find a German KofreBa! adventure in here called Edible Gold, packed with references that are as silly as they are brilliant. And then there's a Christmas scenario on top of that, because you can never have enough Christmas scenarios and The Leprechaun Who Goes on a Long Journey ... you know, with hairy feet!
