### Product Description

**Am Rande der Verdammnis - Adventure volume** This adventure volume contains three adventures and a setting for the role-playing game *Seelenfänger*. **Pestilenz** by Christof Kalusche and Jörg Köster is set in the inhospitable region of Brackland and the foothills of the Guldensburg massif. A village that has already been ravaged by plagues is once again struck by a deadly disease. How can this new plague be contained? **Seyfahrt's Seelenbank** by Michael Dunkelfels is an entry from the creative competition and presents a seemingly harmless setting with a dark secret. **Das Dorf am Rande der Verdammnis** by Oliver Kersting is located on the Storm Coast. As a result of the curse, the inhabitants have had to make decisions that are now causing them distress. Sinister machinations have angered the sea, and the otherworldly beings are demanding reparations. **In Awakening** by Jörg Köster, the characters are accused of murder in the once splendid region in the west of the land of Tanar. But who is the real culprit? All adventures are suitable for both beginners and advanced players and can be added to any campaign. Optionally, there are also specially customised player characters for each adventure, with suitable backgrounds, abilities and characteristics.
