shipping weight: 1.00 kg
Manufacturer: Revell

Product Description

Revell Control 4in1 RC Engineering Vehicle: Build and control your engineering marvel! Experience a fascinating world of engineering with the Revell Control 4in1 RC Engineering Vehicle! This unique set offers children aged 10 and over the opportunity to experience the real art of engineering up close. Four different models of an engineering vehicle are created from 172 precisely manufactured parts - without any glue. These models range from a grapple with functional pliers to a forklift truck with a moving mast, making not only the assembly but also the play an educational and action-packed experience. The included GHz remote control, which children assemble themselves, increases the learning effect and ensures an authentic control experience. The intuitive operation enables precise control over the movements of the vehicles. The conversion to another model variant is uncomplicated: Simply loosen a few screws and reposition - and a new vehicle is created. Scope of delivery: 172 individual parts for 4 model variants GHz remote control (for self-assembly) Detailed assembly instructions Batteries not included The Revell Control 4in1 RC Engineering Vehicle is perfect for young technology enthusiasts aged 10 and over. It is suitable for beginners in the world of modelling as well as for advanced young constructors. This set promotes fine motor skills, spatial imagination and technical understanding. Ideal for use at home, in the classroom or in youth groups. Special features: Versatility: 4 different model variants offer varied building and playing fun. Self-assembly of the remote control: Promotes an understanding of how remote controls work. Realistic design: Detailed replica of technical vehicles. Educational value: Improves technical skills and encourages interest in engineering. Flexible construction: Easy conversion for a variety of play options. Width: 16 cm Length: 23.5 cm Height: 11 cm Item number 21304 Age recommendation 8
