Product Description

The V2 rocket is one of the most famous so-called wonder weapons that turned the tide of the war. This construction still fascinates many history and world war enthusiasts. This legendary design was so desirable that COBI could not resist the increasingly frequent questions about this set. Here is the legendary V2 rocket in 1:35 scale. The rocket itself has a removable cover that conceals a replica interior: a powerful rocket engine, a fuel tank and a warhead with an explosive charge! The 560-piece set includes: V2 rocket model with replica interior elements. Launch platform V2 rockets (Vergeltungswaffe 2) were the world's first long-range ballistic missiles. They were developed by Nazi Germany during the Second World War and their main designer was Wernher von Braun. V2s were used by the Germans from 1944, mainly for attacks on London and other Allied cities. The V2s had a range of around 300 km and could carry an explosive charge weighing around 1 tonne. The design was based on ground-breaking engines that burn liquid fuel. After launch, the rocket climbed to an altitude of around 100 km (that's space!) and then plummeted towards the target at enormous speed, making it virtually impossible to intercept. The V-2 was the forerunner of modern ballistic missiles and had a significant influence on the development of space technology after the war. - 560 high-quality elements, - manufactured in the EU by a company with over 35 years of tradition, - fulfil the safety standards for children's products, - fully compatible with clamping building blocks of other brands, - only permanent prints - no stickers. - clear and intuitive building instructions, based on drawings and symbols, - scale 1:35 - model dimensions (length x height): 38.5 cm (15.1 inches) x 8 cm (3.1 inches) Specification - catalogue no.: COBI-3121 - Manufacturer: Cobi Factory SA - Length: 38,5 cm / 15.1? - Width: 8 cm / 3.1? - Scale: 1:35 - No. of parts: 560 - No. of figures: 0 - Age group: 9+ Warning!
