Product Description

The set consists of:- 1 piece of double-size grid foam insert 550 mm x 345 mm x 90 mm (DS090R)- 1 piece of foam base 550 mm x 345 mm x 10 mm (DS010B)- 1 piece of studded foam 540 mm x 340 mm x 20 mm (CFNP020)- 1 piece Auer Packaging Euro container / Euro Box case with handle ED 64/17 1G (DSEB165G)Set of Eurobox 600 mm x 400 mm x 135 mm filled with 1 grid foam insert. The grid of the foam allows the foam inserts to be customised to all shapes. It is ideal as protection for the transport of various industrial goods such as medical equipment, individual tool parts or technical devices. The grid foam is perforated with a grid of 20 mm x 20 mm x height of the insert (90 mm), as well as a circumferential edge of 25 mm. We use a 10 mm thick base (DS010B), which enables even heavy products to be transported. The dimpled foam serves as a top cover and is cut to fit the lid of the Auer Eurobox perfectly. As it is equipped with a self-adhesive film, you do not need any further aids. All you have to do is remove the adhesive film from the foam insert and stick the self-adhesive side into the hinged lid of the Eurobox. The entire set can therefore be designed, customised and used according to your personal requirements without any special tools.Information on DS090R grid foam:- Dimensions: 550 mm x 345 mm x 90 mm - Made in Germany- Chlorine-free and acid-free- Bulk density 23.0 kg/per cubic metre (+/- 2.0)Information on CFNP020 studded foam:- Dimensions: 540 mm x 340 mm x 20 mm- Made in Germany- Chlorine-free and acid-free- Bulk density 23.0 kg/per cubic metre (+/- 2.0)Information Auer Packaging Euro container / Euro box case with handle ED 64/12 1G (DSEB115G):All-rounder with handle - The Euro container case from AUER Packaging has two practical handles for safe and convenient carrying of the container - even with heavy contents.
