Product Description

Orléans (8th edition) Description Orléans is about gaining supremacy in medieval France through trade, building and science. The focus is on the city of Orléans and the Loire region, where you can undertake trading trips to other cities to obtain coveted goods and build trading posts. The special feature of Orléans is the way in which actions are triggered. You need different people such as farmers, craftsmen, knights or monks. Each player assembles their own followers during the course of the game. Each profession is associated with certain advantages. Knights, for example, increase your own radius of action and are also needed to accompany trade journeys. Craftsmen can be hired in the village to help build offices and make tools. Scholars are important for driving progress. And last but not least, it is worth becoming active in the monastery, because with the help of the monks you are less at the mercy of fate. You always want to carry out more actions than you can, and there are many ways to reach your goal. The game offers plenty of options: You can acquire additional actions, get involved in one area or another. Depending on your strategy, you should consciously choose and coordinate your followers and all other game elements. Our new edition of the classic ORLÉANS can now be played with up to 5 players without the additional expansion for the 5th player. As many of our partners have already brought this version onto the market, we have also adapted the 8th edition accordingly. Of course, the 5th player expansion is still available for customers who already own an ORLÉANS. The box size has remained unchanged, only the weight has been increased. Important notes Caution! Not suitable for children under 36 months.
