📄 Product Description

Item no.: 300056357 Item description: 1:14 RC MB Arocs 3348 rear tipper 3-axle Ready for the building site? TAMIYA presents the first dump truck in the Mercedes-Benz Arocs 3348 version! The tipper body consists of a sturdy ABS part and has a movable and automatically unlocking tailgate. The payload is max. 10kg and the body can be tilted by radio using the optionally available ACU-01 spindle drive unit. The unmistakable design of the new Arocs is as unusual as the truck as a whole. For example, a radiator grille in the so-called excavator tooth look was installed in the look specially developed for construction vehicles, which is intended to convey the message: "Bite through and grab". Special protective grilles for the lighting system are attached to the bumper to match the robust appearance. The 576 mm long and approximately 3.5 kg heavy kit model can be used to assemble impressive combinations. The proven and robust TAMIYA truck technology can be found under the cab, which can be tilted forwards. A new Mighty-Tuned 35T electric motor transmits its power to the two rear axles via a switchable 3-speed gearbox. A detailed aluminium ladder frame gives the model the necessary stability and flexibility.A special additional frame has been installed for the body, which makes the model particularly stable.A towing jaw (e.g. Carson 500907182) can be attached to the rear part of the frame and used to pull trailers. With the optionally available multifunctional unit, almost all sound and light functions of the prototype can be simulated deceptively realistically. Required accessories:- At least 4-channel remote control - recommended Carson ReflexStick 500501006 (6-channel), 500501003 (14-channel) or500501004 (14-channel LCD display)- 7.2V NiMH battery pack, charger- TAMIYA TS paint for painting- Steering servo + servo for manual gearbox- Speed controller or TAMIYA multifunctional unit MFC-03 300056523for the driving, light and sound functions- TAMIYA ACU-01 spindle drive unit (300056545) for drivingthe body. The ACU-01 is plugged into the multifunctional unit. Scope of delivery:Kit model with detailed instructions, electric motor, 3-speed manual gearboxWARNINGS:The instructions should be read and understood in full together with an adult. Keep away from small children. Do not allow children to put any parts or packaging material in their mouths. The model may have some sharp corners. Pay attention to this when handling. Read the instructions supplied with the RC unit and keep them for future reference.If you encounter difficulties during assembly, ask an adult to supervise the work or a model builder with RC experience or a specialist dealer.Only use tools for their intended purpose. There is a risk of injury if used incorrectly.Item no.: 300056357 Item designation: 1:14 RC MB Arocs 3348 Rear tipper 3-axleIf you use paint and/or glue (not included in the kit), observe and follow the instructions supplied with the kit.Keep the kit away from small children.
