Product Description

Russia in 1762: Tsar Peter III was forced to abdicate after a coup d'état and Catherine the Great was proclaimed the new Tsarina. The game Catherine - The Cities of the Tsarina takes us back to this time. The players take on the role of advisors and try to win Catherine's favour in order to be the most important advisor at her side at the end of the game. There are many ways to achieve this goal: some players focus on expanding the empire, others are involved in the flourishing trade in goods or decide to promote the arts. In the end, Katharina will decide who she favours. Katharina is characterised by an innovative card mechanism. For each action, a decision must be made as to whether the action of the card itself should be used or whether it should be used to activate other actions.
