Product Description

Item no.: 510001235 Item description: 1:72 EF-111 A Raven The General Dynamics EF-111 Raven was developed on the aerodynamic airframe of the F-111 Aardvark ground attack aircraft. The supersonic aircraft with the characteristics of variable geometry wings was indeed identified as a suitable platform to house the electronic components required to effectively perform the new assigned tasks. The EF-111 Raven thus became a reference point for electronic warfare missions and was used in numerous operational activities in Libya, Bosnia and Iraq. Easily recognisable by the prominent bulge on the rear tail, it was equipped with state-of-the-art electronics for its time, including a terrain mapping radar and the introduction of radar jamming and electronic countermeasure systems. The cockpit was also redesigned by installing a control "suite" specifically for the Electronic Warfare Officer (EWO), the officer specialising in electronic warfare. Kit model, scale 1:72, EF-111 A Raven, transparent parts, instructions, decals, Attention! Not suitable for children under 14 years. Product details- Detailed model kit in 1:72 scale.- The high-quality kit from Italeri must be assembled by the customer.- The independent assembly is accompanied by step-by-step and illustrated assembly instructions. The assembly instructions are of course included in the scope of delivery.- Based on the assembly instructions, the precisely fitting individual parts must be assembled. The parts can be painted according to your own ideas.- Tools, glue and paint are not included with the plastic kit. These must be purchased as an option.
