## 1:56 Italian tanks Semoventi

from **16,26 EUR**

Item no.: 396711  
shipping weight: 0.20 kg  
Manufacturer: ITALERI

### Product Description

Item no.: 510025768 Description: 1:56 Italian tanks & Semoventi The production of Italian tanks during the Second World War centred on the "M" versions. The M-13/40 was the most famous and widely used tank of the Regio Esercito. Equipped with a 47 mm gun, it was characterised by the original structure of the tracks and suspensions as well as the protection provided by the characteristic "bolting". The M-40 self-propelled gun was also developed on its chassis. Armed with a 75 mm howitzer installed in a casemate, it was feared by enemy tanks. The best results were achieved when the M-13/40 was used in combination with self-propelled guns, which could compensate for the limited firepower of the tank. In the course of the war, both the tanks and the self-propelled guns were improved by technical solutions and armament. Kit model, scale 1:56, 1:56 Italy. Armour & Semoventi, movable track links, instructions, decor, Attention! Not suitable for children under 14 years.
