Product Description

Item no.: 510001469 Item description: 1:72 F-35C Lightning II The JSF (Joint Strike Fighter) programme was launched to develop a new fifth generation multi-role fighter capable of being a valid alternative to ground attack aircraft of the United States and NATO countries. This project resulted in the single-seat Lockheed Martin F-35 Lightning II aircraft. Equipped with exceptional technology, it is characterised by the use of an aerodynamic configuration with stealth characteristics and a trapezoidal wing. Designed for air superiority missions, close air support and ground attack, its fuselage can be customised in various configurations. The F-35A operates from conventional runways, the F-35B is designed for vertical take-off and landing, and the F-35C is ideal for conventional aircraft carrier operations. The F-35C is characterised in particular by its folding wing tips to optimise on-board storage, an arrestor hook and a reinforced nose landing gear suitable for the catapult launches of US Navy aircraft carriers. Model kit, scale 1:72, 1:72 F-35C Lightning II, transparent parts, instructions, decals, Caution! Not suitable for children under 14 years. Product details- Detailed model kit in 1:72 scale.- The high-quality kit from Italeri must be assembled by the builder.- The self-assembly is accompanied by step-by-step and illustrated assembly instructions. The assembly instructions are of course included in the scope of delivery.- Based on the assembly instructions, the precisely fitting individual parts must be assembled. The parts can be painted according to your own ideas.- Tools, glue and paint are not included with the plastic kit. These must be purchased as an option.
