1:48 A-20B Boston III

from **34,20 EUR**

Item no.: 396694
shipping weight: 0.20 kg
Manufacturer: ITALERI

Product Description

The twin-engine Douglas A-20 was developed by the American aviation company to fulfil two main tasks. Its fuselage, with the characteristic mid-height cantilever wing, could be configured as a night fighter and attack aircraft with a powerful weapon system in the forward fuselage, as well as a light bomber. The light bomber version achieved significant success not only with the U.S.A.F., but also with the British RAF, which named the Douglas aircraft "Boston". The nose of the Boston was glazed to accommodate the bombardier, but retained the then innovative nose wheel landing gear. It could carry up to 1,800 kg of offensive payload and was produced in large numbers and used by the RAF, numerous Commonwealth air forces and some units of the Soviet Air Force. Model kit, scale 1:48, A-20B / Boston III, transp. parts, instructions, decals, Caution! Not suitable for children under 14 years. Product details- Detailed model kit on a scale of 1:48.- The high-quality kit from Italeri must be assembled independently.- The independent assembly is accompanied by step-by-step and illustrated assembly instructions. The assembly instructions are of course included in the scope of delivery.- Based on the assembly instructions, the precisely fitting individual parts must be assembled. The parts can be painted according to your own ideas.- Tools, glue and paint are not included with the plastic kit. These must be purchased as an option.
